

Prescription Medications:

All prescription medications shall be listed on the appropriate forms by the parent/guardian. All prescriptions shall be current within 30 days of the fill date for a 30 pill count prescription and within 90 days for a 90 pill count prescription. The count of medication in the bottle will be appropriate, and the medication shall match the description of the pill located on the prescription label. **If there are any discrepancies noticed in the pill count of more than 2 days or if other discrepancies are noticed, (too many pills in the bottle, different colored pills in one bottle, prescription fill date is greater than is allowed), the medication will be secured in the medication lock box and shall not be administered until the parent/guardian has the prescribing physician fax orders to restart the medication to the nurse.** The parent/guardian may also sign a dual release consent enabling the nursing staff to fax the request to the prescribing physician. The contact information for the physician must be provided by the parent/guardian.

No narcotic medications will be accepted or administered.

Sample Medications:

Sample medication will not be accepted without the prescribing physician's written order. The medication must be in an original-unopened-sealed container.

Non-prescription Medications:

The only OTC (over the counter) medications acceptable into the facility will be in the original-unopened-sealed container. Unless instructed differently by the health service coordinator, the medication shall be administered as indicated on the product instructions. No "gummy" type medication will be accepted.
