Economic and Market Commentary: Looking like a trillion bucks

AUGUST 1, 2021

If you hear a new or even a shocking word enough times, it usually loses its impact. But "trillion" never seems to get there. Despite the numerous trillion-dollar federal stimulus packages this year, it remains a tremendous amount of money in nearly everyone's mind. So, it's no small thing that use of the Federal Reserve's Reverse Repo Program (RRP) has lately approached the \$1 trillion mark. It was below \$100 billion as recently as April. In March, the Fed increased the counterparty limit for from \$90 billion to \$80 billion and then in June raised the rate to 5 basis points. Usage has steadily grown since then, and it's been a valuable outlet for the money markets, which are still facing heavy demand.

Fed Chair Jerome Powell mentioned in his comments after the Federal Open Market Committee (FOMC) meeting last month that policymakers have been discussing tapering—the winding down of their massive asset purchase program. The meeting did not include a Summary of Economic Projections, but not surprisingly, Powell also sang the same refrain on inflation. Policymakers won't budge until inflation is elevated for many months, and they are betting prices will pull back. We think they are stickler. While the National Bureau of Economic Research just dated the Covid-19 recession as lasting

only from late February to early April 2020, it's the aftermath that matters. The Fed needs to keep its head up.

In the meantime, the biggest issue for cash managers remains the recent decline in Treasury bill issuance and the low supply of Treasury bills, a combination that continues to hold down yields. The decline in issuance is tied to the reinstatement of the federal debt limit on Aug. 1, and we expect constrained issuance until Congress takes action to raise the limit. The Treasury should have enough cash and other measures to meet the basic funding needs of the government into the fall. We fully anticipate that lawmakers will eventually either raise the limit or suspend it again. Expect political theater, but nothing serious.

The other trillion-dollar issue hanging around is the infrastructure deal. The senate finally voted to take up the bill. But everyone—particularly in state and local governments—is still playing the waiting game for the details.

At the end of July, yields on 1-, 3-, 6- and 12-month U.S. Treasuries were 0.05%, 0.05%, 0.06% and 0.07%, respectively; the 1-, 3-, 6- and 12-month London interbank offered rates (Libor) were 0.09%, 0.13%, 0.16% and 0.24%, respectively; and the weighted average maturities (WAMs) of TexPool and TexPool Prime were 31 and 53 days, respectively.

90-Day Treasury Bill is a short-term debt instrument backed by the national government. These are used to collect immediate cash to meet outstanding obligations.

Any private investor can invest in a Treasury bill. The 90-Day Treasury Bill is a weighted average rate of the weekly auctions of 90-Day Treasury Bills.

**Definition of Weighted Average Maturity and Weighted Average Life

WAM is the mean average of the periods of time remaining until the securities held in *TEXPOOL* (a) are scheduled to be repaid, (b) would be repaid upon a demand by *TEXPOOL*, or (c) are scheduled to have their interest rate readjusted to reflect current market rates. Securities with adjustable rates payable upon demand are treated as maturing on the earlier of the two dates set forth in (b) and (c) if their scheduled maturity is 397 days or less, and the later of the two dates set forth in (b) and (c) if their scheduled maturity is more than 397 days. The mean is weighted based on the percentage of the amortized cost of the portfolio invested in each period.

WAL is calculated in the same manner as WAM, but is based solely on the periods of time remaining until the securities held in *TEXPOOL* (a) are scheduled to be repaid or (b) would be repaid upon a demand by *TEXPOOL*, without reference to when interest rates of securities within *TEXPOOL* are scheduled to be readjusted.
