

Brazoria County has announced a new, free prescription discount card for all Brazoria County residents. The card, called BetterRxCard, provides significant savings at 45 county pharmacies, including Walmart, CVS, Walgreens, Kroger, Randall's, HEB and Medicine Shoppe, among others. This card has two savings features designed to help when insurance is not available for your medication, or if you want to try to reduce expense brand name drug costs.

The first way provides an average savings per prescription of \$26 – a discount of 43% – on most drugs, when presented at the pharmacy counter. Simply pick up a card at a local county office ([click here for the latest list](#)) and you can use it at most county-based pharmacies and 60,000 across the U.S. There is no sign-up process or membership fee, everyone qualifies, there are no limits or expiration date and it is ready for immediate use. The card may not be used in addition to insurance you may have.

The second savings feature from BetterRxCard is called EquivaMeds. This is an online tool that helps you find lower cost prescription drug options to your expensive brand-name drugs – even if a generic isn't available – and then helps you work with your personal physician to see if a switch is right for you. The average savings for EquivaMeds users recently was over \$60 per month. EquivaMeds is offered for free to Brazoria County residents with a BetterRxCard. Once you have a card visit: www.BetterRxCard.com/Brazoria and click on the EquivaMeds link.
